

Automated Methods for Groove Identification in 3D Bullet Land Scans

Kiegan Rice

4/3/2018

Method 1: Rollapply

function name: `get_grooves_rollapply` or `get_grooves(method = "rollapply")`

Method 2: Robust Linear Model (4*Median Cutoff)

Method 3: Positive Residuals Cutoff

Method 4: Median Absolute Deviation Cutoff

Method 5: Predicting Groove Sides
